**Bridges Unlimited Expands Environmental Consulting Services to Hot Spot Analysis**

**(Denver, Colorado)** – Bridges Unlimited LLC is expanding its air quality consulting services for to include conformance to county, state, and federal transportation standards and requirements for air quality, as well as compliance with state and federal ambient air quality standards, announced Carol Lyons, President. This will include air quality dispersion models to calculate potential air quality hot spots for compliance with Transportation Conformity Rules.

Bridges Unlimited offers high quality environmental consulting services to business, industry, and government agencies. Since 1986, Bridges Unlimited has maintained its commitment to independent objective science to provide clients with cost-effective environmental compliance solutions, according to Carol Lyons, founder and lead engineer.

Technical staff members at Bridges Unlimited LLC will continue long-term collaborations with local, state, and federal government agencies to maintain up-to-date air quality and air pollution analysis and regulatory compliance for private sector clients. Current environmental consulting services include air dispersion modeling; air pollution prevention, reduction, control, and compliance; cost effective compliance with environmental regulations and pollution reduction; regulatory analysis and environmental permitting; interdisciplinary program management / design, implementation, completion; and industry / government / community communication.

Bridges Unlimited develops and implements successful long-term environmental compliance programs for businesses, government agencies, and the community through collaboration with clients and stakeholders, careful listening, and problem analysis.
